### MATERIALS & RESOURCES

---

Credit 2.1	<b>Construction Waste Management – Divert 50% From Disposal</b> 25-33% of all landfill is waste from construction, renovation and demolition. 57% of that is from commercial buildings. IFI Brick & Stone nearly eliminate construction waste and landfill disposal compared to conventional construction.	1 Point
Credit 2.2	<b>Construction Waste Management – Divert 75% From Disposal</b> 25-33% of all landfill is waste from construction, renovation and demolition. 57% of that is from commercial buildings. IFI Brick & Stone nearly eliminate construction waste and landfill disposal compared to conventional construction.	1 Point
Credit 3.1	<b>Material Reuse – 5%</b> IFI Stone & Brick veneers are made from inert materials. Veneers can be salvaged and reused when the buildings they are used in are demolished and contributing to this point for future projects.	1 Point
Credit 3.2	<b>Material Reuse – 10%</b> IFI Stone & Brick veneers are made from inert materials. Veneers can be salvaged and reused when the buildings they are used in are demolished and contributing to this point for future projects.	1 Point
Credit 4.1	<b>Recycled Content – 10% (post-consumer + ½ pre-consumer)</b> IFI Stone & Brick veneers are made from post-consumer and pre-consumer content that exceeds the 10% requirement.	1 Point
Credit 4.2	<b>Recycled Content – 20% (post-consumer + ½ pre-consumer)</b> IFI Stone & Brick veneers are made from post-consumer and pre-consumer content that exceeds the 20% requirement.	1 Point
Credit 5.1	<b>Regional Materials – 10% Extracted, Processed &amp; Manufactured Regionally</b> IFI Brick & Stone veneers are manufactured in Chicago, IL. This location may fall within the 500 miles radius for your project thereby supporting the use of local resources and reducing the environmental impact.	1 Point
Credit 5.2	<b>Regional Materials – 20% Extracted, Processed &amp; Manufactured Regionally</b> IFI Brick & Stone veneers are manufactured in Chicago, IL. This location may fall within the 500 miles radius for your project thereby supporting the use of local resources and reducing the environmental impact.	1 Point

---

## Energy and Atmosphere

---

Credit 1	<b>Optimize Energy Performance</b> IFI Stone & Brick Veneer increases the thermal capacity of buildings and minimizes the indoor temperature fluctuations. This reduces the need for heating and air conditioning. IFI Stone & Brick may contribute up to 10 points.	1 Point
----------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------

---

## Indoor Environmental Quality

---

Credit 7.1	<b>Thermal Comfort</b> IFI Stone & Brick Veneer increases the thermal capacity of the building envelope which enhances the thermal comfort of building occupants.	1 Point
------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------

---

## INNOVATION & DESIGN PROCESS

---

Credit 2	<b>Innovation in Design</b> Construction Waste Management – Divert 95% or greater From Disposal IFI Stone & Brick can contribute an additional point through exemplary performance by diverting 95% of construction waste from disposal after earning Credit 2.1 and 2.2	1 Point
Credit 3	<b>Innovation in Design</b> Materials Reuse – 15%. IFI Stone & Brick can contribute an additional point through exemplary performance by documenting up to 15% of salvaged and reused materials and after earning credit 3.1 and 3.2.	1 Point
Credit 4	<b>Innovation in Design</b> Recycled Content – 30%. IFI Stone & Brick can contribute an additional point through exemplary performance by documenting up to 30% recycled content and after earning credit 4.1 and 4.2.	1 Point
Credit 5	<b>Innovation in Design</b> Regional Materials – 40% Extracted, Processed & Manufactured Regionally IFI Stone & Brick can contribute an additional point through exemplary performance by documenting up to 40% or greater regionally harvested, extracted and manufactured materials and after earning credit 4.1 and 4.2.	1 Point
